## Part I

# Preparing for a New Earth

*Question:* You're saying that we're coming to a change of epoch in the course of celestial cycles. And you're saying this change corresponds to the dawn, or the spring, in that energy and consciousness will be dramatically expanded?

*Petrus:* Yes. We're already in the dawn, and a major shift will come with our celestial sunrise. Light from a higher-order sun, around which our galaxy rotates, will suddenly become much stronger. The volume and potency of this light will make our old experience impossible. The old Earth will end and a New Earth will begin.

*Question:* So "the end of time" attributed to the Mayan calendar is good news?

*Petrus:* Yes, absolutely. We'll graduate from the prison of linear time -- trapped between a bitter past and a threatening future. We'll find ourselves living in the eternal present, always connected to the source of life. Then we'll experience unity, and create the world that we've longed for. Love, peace, freedom, beauty and knowledge will not merely be ideals: we will live them.

*Question:* Should people attempt to prepare for this change? Can they prepare?

*P:* External preparations, involving physical infrastructure for example, may prove to be irrelevant. We're talking about change on a cosmic scale: things we can barely visualize at this point. Yet all of us can prepare ourselves within. And this is where we can usefully put our attention and effort.

*Question:* What do you mean by internal preparation? What kinds of things do you encourage people to do to successfully enter Earth's next age?

*Petrus:* I like to speak of our passage to New Earth as a migration. We're travelling to a new reality: with new frequencies, new dimensions, a fundamentally different experience of time, space, thought and feeling. So I've made a list of twelve travel tips! These tips call for interior preparations, that we make within our hearts. This is because the passage to New Earth lies within our hearts!

## Part II

# Twelve Travel Tips

### 1. Release Constraints

Stopping telling yourself *no* and *can't*. When we focus on limitations we cement them. Don't fence yourself in with pessimistic assumptions. Improbable things happen every day: to people who make their own luck.

Don't ignore or deny your actual circumstances. Just dance with them, laugh with them, and convince them of your true desires. It turns out that all the fences all around us have unlocked gates. It's just that we're only starting to notice! Release constraints.

### 2. Discover Happiness Within

Most of the things and experiences that we need and want are readily available to us. And what's not yet available will be created. Fulfillment comes naturally when we let go of fear and allow joy as our birthright.

Happiness doesn't come in packages from the outside; it grows like a garden on the inside. Money, power and prestige aren't bad, but they can't actually make us feel good. Worldly advantages only amplify whatever we already feel. So don't chase after happiness in a world of scarcity. Discover happiness within, and cultivate love and joy.

### 3. Take Time to Transcend Time

Be present for who you are and what you feel. Recreate. Contemplate. Meditate. Stop reducing yourself to a personality in a physical body, and take a break from the endless demands and promises of this world.

Dive into the ocean of being! If you don't know how, find someone to show you. Once you make a habit of this, you will make an astounding discovery. Your essence is consciousness itself. At the risk of sounding corny, my advice to you is wake up and smell the infinity! Take time to transcend.

## **4. Recover Your True Self**

In your daily life, allow that you live beyond your local form, and not just within it. The true self never dies, has no limits, and experiences everything it can ever dream up. God doesn't judge you or ignore you: God is you.

Infinite in nature, you can never really be confined to a specific time and place. You can only play make-believe! Once we understand this, our self-created dramas become much more dynamic and fun. When the silence is deeper, the music is stronger. Recover your true self.

## **5. Honour Everyone and Everything**

Each of us has at our centre the very same self: deathless and unlimited. Therefore, everyone and everything you encounter actually expresses your true self! Through them, your infinite self is always showing you – as a local self – how to ride the universal current. Positive and negative experiences guide us equally, so that even an enemy can serve as a guide.

We used to think of everyone and everything as other to ourselves. Some others might hurt us, and some might help us, but each of us ultimately felt alone. But nothing is truly other when everything is One. So, no matter if others please you or challenge you, honour all of them as they come to you: just as you honour your self. Honour everyone and everything.

## **6. Release Separation for Unity**

This universe belongs equally to all of us. All people and things, all atoms and galaxies, are but One. Your life is special and unique, yet also an inseparable part of the universal whole. As soon as you allow that you belong to everything, everything belongs to you. Then separation dissolves and unity begins. Opposition and competition give way to harmony and synergy.

And when we all do this, our planet of poverty, disease and war will turn into a world of abundance, health and peace. The tide is turning now, and our New Earth is about to begin. Your passage to this world of our dreams goes right through the centre of your heart. Release separation for unity.

## **7. Discover Your Presence in All Dimensions**

Did you know you have several different bodies? Each of your bodies is resident in a different band of the universal frequency spectrum. As we release separation, we can appreciate these different bodies, and begin to integrate them: from the physical body, which is most solid and short-lived, all the way to the light body. This is the basic, original form of individuality, which enables us to explore the universe across the dimensions and ages.

We've already begun to integrate our forms across the dimensions, from the most concrete and resultant level that we've identified with, to the most fluid and causal level, which equally belongs to us. Not only we humans, but our entire planet is doing this. New Earth will bring it all together, and bring it all home. Discover your presence in all dimensions.

## **8. Make Friends with the Unseen**

When we integrate across the dimensions, we dramatically expand our social networks. When we regain the cosmic scope of life, we are free to work and play with many different kinds of beings, all across the dimensions and domains of this universe.

Don't get hung up on fears about evil influences. If some connection doesn't feel right, it isn't for you. So don't pursue it. But where you feel love, there is love. Build on the connections that make you feel good. Get out of the box of frequency limitation and planetary segregation. Get out there and have some fun! Make friends with the unseen.

## **9. Live from the Centre**

Stop pretending that you're just a consumer, and start celebrating your life as a creator. Live from your own centre, which just happens to be the centre of the universe! We could sit back and passively absorb the products and messages of large institutions and major corporations.

But then we'd become their objects, and devalue ourselves as sovereign subjects. So cook your own supper, tell your own news, sing your own song. Your soul brothers and sisters will hear you, and they will join you. Together we will create our New Earth... from the inside out. Live from the centre.

## **10. Give from Your Gifts**

Offer all of yourself to everyone and everything. Let your gifts shine for all to enjoy! Don't worry about things you cannot be or do. Other people are ideally qualified to take care of those things.

Revel in what you are, what you know, what you bring to this world. Your greatest privilege is to bring happiness to others in the way that only you can. Give from your gifts.

## **11. Receive the Gifts of Others**

Every person and thing you encounter offers you a gift. They wait only for you to accept it! Forget all those lifeless ideas about the privileges and possessions that you need and deserve.

Accept the beautiful gifts of others innocently and spontaneously. You just need to open the eyes of your heart. Join life's wonder, and become a citizen of natural abundance. Receive the gifts of others.

## **12. Trust in Life**

Seeking control is folly. We cannot control the great river of life. But if we let it flow, it will naturally carry us forward. Just relax into the knowledge that you are loved! Your evolution is universally supported, and your fulfillment is actually inevitable. Enjoyment is your duty and your destiny. Trust in life.
